REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: Applicants claim a natural rubber which contains proteins having a molecular weight of more than 14 kDa, substantially no proteolytic enzyme and its decomposed compounds and substantially no proteins specified by the bands of 14, 31 and 45 kDa by SDS-PAGE and having a nitrogen content of 0.02 to 0.30 % by weight of natural rubber. The nitrogen content was taught by the additional reference of Hamada et al. However, in order to obtain the nitrogen content taught by Hamada et al., the rubber was deproteinized with a proteolytic enzyme. In order to obtain the nitrogen content taught in Hamada et al. in the rubber of Cornish, proteolytic enzymes would be utilized and would then be present in the resulting product rubber. Therefore, there is no art of record or knowledge of one of ordinary skill in the art that show how to obtain the nitrogen content of the instant claims without using a proteolytic enzyme.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
